

MOHUBE TUMISHO MAKGERU

Cybersecurity Consultant • Software Engineer

Midrand, Gauteng | makgerutumisho55@gmail.com

[GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

CompTIA Security+ certified professional with over a year of hands-on experience in software engineering and security, spanning cybersecurity, backend and frontend development, and infrastructure automation. Currently specializing in server provisioning with Ansible, Linux administration, and secure secrets management via HashiCorp Vault. Skilled in Identity and Access Management (IAM), AWS architecture, and robust backend software design, with a strong grounding in unit and integration testing within Agile environments.

Technical stack includes Java, Python, JavaScript/TypeScript, SQL (PostgreSQL, MongoDB), Docker, React.js, and Git. Experienced in building RESTful APIs with Node.js, Express, and FastAPI, leveraging Prisma ORM and Postman for efficient development cycles.

PROFESSIONAL EXPERIENCE

Mavuma Enterprise — Junior DevOps / Software Engineer

March 2026 – Present

Remote

- Provision and manage server infrastructure using Ansible, ensuring consistent and automated environment configuration.
- Develop and maintain Python and Bash scripts to streamline system administration, monitoring, and operational tasks.
- Implement and manage secrets management solutions, ensuring secure handling of credentials and sensitive configuration data.
- Collaborate with senior developers in Agile ceremonies (sprint planning, daily stand-ups, retrospectives), contributing to task scoping and delivery alignment.
- Built a customer support dashboard using React.js, JavaScript, CSS, FastAPI, and Python.
- Executed internal penetration testing and pre-launch security assessments of software products using Nmap, ssh-audit, Nikto, and Kali Linux to identify and remediate vulnerabilities.
- Performed unit testing of software products prior to launch, validating functionality and security posture to ensure reliable, production-ready releases.

Adakin Digital — Intern Software Developer

Nov 2025 – Feb 2026

Remote

- Developed robust backend software and architecture using JavaScript, TypeScript, Prisma ORM, PostgreSQL, and Postman.
- Contributed to data analytics by assisting in the construction of essential data pipelines.
- Managed project tasks and participated actively in sprint planning sessions, using Azure DevOps for ticket creation.

WeThinkCode_ — Technical Mentor

Sep 2025 – Dec 2025

Rosebank, South Africa

- Served as a Technical Mentor during the first phase of the program, fostering both technical growth and collaborative learning among students.
- Facilitated workshops to enhance students' technical understanding and problem-solving skills.
- Provided technical guidance and support to mentees throughout their learning journey.

- Encouraged teamwork and collaboration in developing innovative software solutions.

OUTsurance (OSS) — Customer Service Advisor

Aug 2022 – Jul 2024

Remote (UK-based)

- Provided outstanding customer service for Hastings Direct, a UK-based insurance broker.
- Assisted customers with inquiries, policy renewals, claims processing, and general support.

OUTsurance (OSS) — Renewals Advisor

Apr 2021 – Jul 2022

Remote (UK-based)

- Managed insurance renewals for Hastings Direct, ensuring smooth transitions and customer retention.
- Handled renewal negotiations, offering tailored solutions to meet customer needs.

CERTIFICATIONS

1. CompTIA Security+ — [Verify credential](#)

Proficient in core security functions, specializing in risk management, threat detection, and mitigation techniques to secure enterprise environments.

EDUCATION

WeThinkCode_ — Higher National Diploma (NQF 6), Computer Software Engineering

- Block 1 — Programming Fundamentals & Object-Oriented Programming: Python, Java, Git/GitLab, OAuth, Google OAuth API, HTTP REST API, JSON, Linux, DevOps, Apache Maven, JUnit.
- Block 2 — Brownfield Software Development & Client-side Web Applications: Automated Testing, HTML, CSS, JavaScript, Docker, SQL, Agile, CI/CD Pipelines.

HyperionDev — Full Stack Web Developer Bootcamp

- Bootstrap, JavaScript, SQL, MongoDB, MySQL, Express.js, Node.js, React, Redux, DOM Manipulation.

Acts House of Education — National Senior Certificate (Matric), 2020

SKILLS

Cybersecurity

Access Control • Cryptography • Cyber Forensics • Firewall Configuration • Threat Detection & Management • Penetration Testing (Nmap, Nikto, ssh-audit, Kali Linux) • Data Security • Disaster Recovery Planning • Information Security Management • Malware Identification • Mobile Device Security • Network Security • Security Awareness

Development & Tools

HTML • CSS • JavaScript • Python • Java • React • Redux • Node.js • Express.js • MongoDB • JSON Web Tokens • Git/GitHub • Bootstrap • Heroku • Netlify

Soft Skills

Communication • Teamwork • Conflict Management • Problem Solving
